

Fast, easy and intuitive.

Lumion 2023, Bring your vision to life.

Real-time 3D visualization software,
Realistic photo and animation video renderings.
lumion3d.fr

Bring your project to life.

Create your own perspectives, project presentations, communication images, videos, 360° panoramas, and virtual tours in record time, using digital models from your design software.

Lumion will amaze you with its easy interface, real-time visualization features, and the high quality and hyper-realistic renderings achieved in no time.

Ultra-fast and realistic photo & video rendering

Optimize your lead times with ultra-fast rendering speeds and obtain hyper-realistic perspectives in just few seconds (Full HD).

Real time Visualization

Compatible with various modeling software, allowing immediate connection of your digital models and real-time visualization through Livesync.

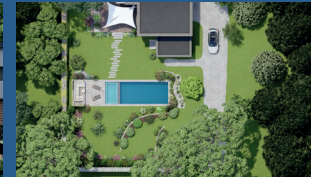

Ray Tracing

Powered by a completely reworked rendering engine, Lumion 2023 integrates the Ray Tracing to emulate the behavior of light and enhance the quality of your renderings with just a single click.

A rich and customizable library

Bring life and realism to your projects with vegetation, objects, and textures available on Lumion. Customize the library with your own models and materials.

Orthographic Views

Quickly and easily, create your orthographic views and permit images (site plans, elevations, sections, projected state...).

Download existing

In addition to downloading the existing surroundings volumes of your project's with OpenStreetMap, you can also obtain Esri® (ArcGis) satellite images as part of your import.

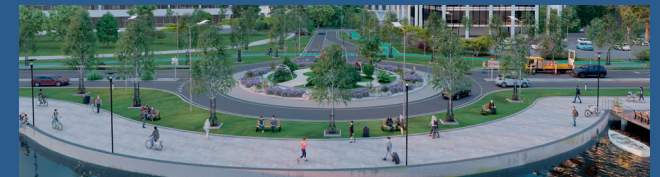

Photo matching

Place your architectural or landscape project within its environment directly in a real photo, without modeling the existing elements, and easily create your perspectives.

PBR Materials

Lumion materials fully integrate PBR (Physically Based Rendering), taking advantage of 8 maps that bring a new level of realism and detail.

Intuitive and Dynamic Video Rendering

Production of animated videos in Lumion 2023 is now easier and offers greater creativity for more realistic and immersive projects showcases.
